

Motion regarding the National Park City Galway

Proposed by: Students' Union President

Council notes:

Making Galway a national park city would change the future of the city to be greener, safer for pedestrians, cyclists and increase public transport.

Council recognizes:

The lead for this project is Brendan Smith who is a previous President of the Students' Union. We commend his work at getting Terryland Forest Park to where it is today.

President Michael D. Higgins is the sole patron of the National Park City initiative. President Higgins was also the first President of NUI Galway Students' Union.

Our current President Pádraic Toomey has been sought as a Champion for the initiative.

Council mandates:

NUI Galway Students' Union supports the National Park City project. Members especially officers work with the group to move it forward to make Galway a National Park City.
