

Motion on access to module material for first year science students.

Council Notes: First year science students haven't covered enough topics in their current modules to decide on what modules to pick at the start of second year.

Council Believes: Giving access to the first three prerecorded lectures of next year's module options will give first year science students a chance to see what the modules they have to pick from will be like, and they can choose their modules for second year accordingly.

Therefore: Council mandates the Students' Union of NUI Galway to campaign for first year Science students to get access to the first three prerecorded lectures of all the modules that they have to choose from.
